the 03. on 11/10

Saturday morning
October 21, 1967
Boulevard Baptist Church

At approximately 6:15 this morning, Saturday, October 21, 1967, I saw two large fiery objects travelling through the sky in a northerly direction from here. The objects were to the north of here.....however their direction of travel was east to west--possibly south east to northwest..

Flying, one slightly behind the other in what would seem to be a formation relationship, they resembled a large tadpole shaped objects...a fiery head with a fiery tail.. large toward the head and diminishing symmetrically toward the tail tip. The objects travelled in what seemed to be a straight course. They were visible for only a very brief period.

Their speed was exceedingly great...much like a meteor or meteorite. The difference was in the course of travel.. These objects maintained the same apparent horizontal course as long as they were in sight. There was no sound connected with these objects. They disappeared into the darkness at what seemed to be the same line of travel as their appearance and flight across the area here.

I called the Office of Sheriff Henry A. Reid, Jr. and reported the sighting. The deputy answering the call left the line at a short time and told me that the city police had received a call from across the river reporting the same sighting.
